Plates will snap out of frames for easy changes with the use of a suction cup.

Acrylic lenses are laser cut and snap into frames featuring paper graphics.

A black anodized aluminum bracket with concealed screws is used to mount double sided frames.

# Architectural Frames, Plates & Lenses

The 7000 series round corner and 8000 series square corner molded plastic frames are designed for quality interior signage. Each frame is molded in one of seven matte colors: **PEWTER GRAY, MEDIUM GRAY, ALMOND, WHITE, BROWN, ARCH BROWN, AND BLACK.** All frames have a 1/2" outside depth, 1/8" thick walls and mounting holes for attaching to walls. The size of each frame is listed as an inside dimension and the inside radius on the round corner frames is 5/16". Each frame is designed to accommodate all sign material from 1/16" to 1/8" thick, or it's own plastic injected molded plate (See next page).

## Molded Plates for Architectural Frames

Molded plates are 1/8" thick with a 1/16" reveal around the perimeter leaving a handsome border. Each plate is designed to snap in and out of respective frames for changeable signs, or can be permanently mounted with two sided tape. Plates are molded in the same six colors as the frames and then are stamped with a tough durable matte finish suitable for hot stamping, vinyl letters, or silk screening. For 2 ply engraving, 6 core colors and 13 surface colors can be combined for a quality contrasting engraved plate.
