Gemini Duets Sample Program Allows Customers to Test Duets Engraving and ADA Substrate Products Risk Free

B.F. Plastics, Inc. announces its Gemini Duets 6"x6" standard sample program, which allows current and potential customers to test the company's Duets engraving and ADA substrates risk free. Users can test Gemini substrate materials on their own laser or rotary engraving equipment with no risk or requirement to purchase sample stock.

This allows customers to refine machine settings based on the sample trial before investing in production and material. The sample program also enables customers to produce small prototypes to show to their own customers or to display in their showroom.

Take the Duets Challenge and test Gemini's premier rotary and laser engraving substrates. We think you'll agree that Duets offers better performance at a better value.

Quality begins in the industry's first cleanroom

Duets™ premium engraving, ADA and architectural sign substrates perform better because they are made better. 100% manufactured in the industry's first Class 10,000 cleanroom at Gemini in Cannon Falls, MN USA. This particulate-free, pressure-balanced environment lets us produce flat, uniform and consistently superior product, every time.

Quality, consistency and value. That's our family's promise to you.

Frosted Materials Added to our BF Cast Acrylics!

We've gotten many requests from customers for cast acrylics with a frosted finish so we've decided to add these to our BF Acrylics product line.

These new frosted acrylics have all the same great attributes as the solid and transparent acrylic products available such as laser engravable, easy to laser, lightweight, durable and weather resistant. Ideal for any type of engraving and signage project such as awards, unique signage, point-of-purchase displays, etc.

[In stock and now available for order on our website!](#)

More Steel Tape Sizes Added

We have recently added new sizes to our Steel Tape product line to help compliment various projects needing temporary mounting application.

These metal tapes (steel) come with adhesive backing and can be used with magnetic tapes. Magnetic tape is a flexible magnetic strip with a premium grade all-weather adhesive backing. For temporary mounting applications.
