

# Turn an ordinary plaque into *something more!*

## Laser Engravable Customizable Photo Plaques

These *BF Woods* Photo Plaques add finesse to a standard plaque and makes a perfect gift for any occasion such as vacations, anniversaries, graduations, sports achievements and so much more. Commemorate significant people, places, or events by incorporating printed photos into your plaque. Assembly is simple and your design capabilities are endless.

## ***BF Woods***

*Offered in Maple, Cherry and Walnut.*

### Easy 3 Step Assembly Process!

**Step 1:** Design your Photo Plaque layout in your graphic design software. Place the Photo Plaque in your laser engraver. Make sure there is no backing material located in the recessed area of the Photo Plaque before laser cutting your design through the face of the plaque. Do not move the plaque from your laser until step 2 completed.

**Step 2:** Begin to laser engrave your Photo Plaque with the raster setting. Then vector cut desired hole area for photo completely out. We recommend using application tape when vector cutting to protect the wood surface. Suggested vector laser settings: using a 50 watt laser at 65% power 3% speed and 250PPI for cutout only.

**Step 3:** Remove plaque from laser, clean laser residue from face of plaque and assemble plaque as desired. Options include but are not limited to the following: Install clear lens, Insert photo, Glue, Tape, Nail or securely fasten photo(s) and/or custom material into place.

### **Makes a perfect gift for any occasion!**
