

**New Duets Tactiles Glow is now available.** Duets Tactiles are made from a multi-layer impact-modified acrylic sheet. Our new Duets Tactiles material uses photoluminescent acrylic to glow in the dark, making wayfinding and directional signage highly visible regardless of light conditions.

Only the highest quality product leaves our plant. We manufacture Duets in our state-of-the-art cleanroom facility located in Cannon Falls, Minnesota allowing us to offer you a better product:

- Dust-free materials
- Tightly-controlled color and finish uniformity
- Consistently the flattest material

We stand behind everything that leaves our plant. And while it's our name on the materials, we know it's your name on the final product. That's a responsibility we don't take lightly.
